

VIDYAYATAN · MARKETING PORTFOLIO

AI video that gets you seen — and content that keeps you found

We script, produce and ship video at a pace no studio schedule allows, then back it with search-ready articles so the attention you earn keeps working long after the post scrolls past.

No studio, no crew

Human-reviewed, always

You own every asset

INSIDE THIS DOCUMENT

- 02 What we do — video and search
- 03 Selected work
- 04 Research method and reporting
- 05 Rate card

- 06 Worked monthly plans
- 07 Scope and industries
- 08 Who we are

Video first, search underneath

AI video earns you attention now. Search content compounds it into a long tail. Video is where we start, and where most of the work happens.

AI video studio

Our core offering

AI production removes the parts of video that make it slow — the studio, the crew, the reshoots. When a message changes we regenerate rather than re-shoot, which is why a week is a realistic turnaround instead of a quarter.

- Scripting from your positioning and real customer questions
- AI-generated presenters, voiceover and B-roll
- Subtitles, captions and platform-specific aspect ratios
- Product explainers, feature walkthroughs and social cuts
- Source files delivered — edits are never blocked on us

SEO blog engine

The compounding layer

Video earns attention; search keeps it. We research what your buyers look for and publish articles on your own domain that keep pulling in readers months after a video has scrolled past.

- Keyword and intent research mapped to your buying cycle
- Content calendar planned a quarter ahead
- Long-form articles AI-drafted, then edited and fact-checked by people
- On-page SEO: titles, meta, headings, internal linking
- Technical SEO — structured data, sitemaps, crawlability

On AI and human review

Video production is AI: presenters, voiceover, B-roll and edits. Articles are AI-drafted. In both cases scripting and final review are human — nothing ships without a person signing it off. We are an AI production company; pretending otherwise would be odd.

Video we have produced

Every clip was scripted, produced and cut by us — no studio, no crew, no reshoots.

EPISODIC SERIES • 0:34
Red Flags — Episode 2

PRODUCT EXPLAINER • 0:34
Crack Recruitment

FEATURE WALKTHROUGH • 0:31
Scored in seconds

BRAND STORY • 0:55
Sold out by morning

EDITORIAL PIECE • 1:00
Fashion as cultural capital

SYNTHETIC PRESENTER • 0:07
AI presenter

And the writing that backs it up

18 long-form articles published across 9 topic areas, live on our own site — the same research, writing and editing standard we apply to client work. Read any of them in full at vidyayatan.com/blog.

How we decide what to make

Nothing gets scripted on a hunch. Five inputs feed the calendar, and every one is a data source you can see for yourself.

Input	Source	What it produces
Search demand	Keyword volume, difficulty, SERP analysis	A ranked topic list scored by volume against difficulty
Your own analytics	Google Search Console, GA4, your CRM	A baseline snapshot, captured before we publish anything
Competitor gap	Ranking pages of three named competitors	Topics with proven demand and no strong incumbent
Voice of customer	Sales calls, support tickets, review sites	Scripts and article angles built on real objections
Channel performance	Your existing social and video analytics	Format mix for month one, revised monthly on results

What lands in your inbox each month

Video

- Views and reach
- 3-second and 50% watch-through
- Saves and shares
- Follower growth
- Click-through to site

Search

- Impressions
- Clicks and CTR
- Average position
- Ranking keyword count
- Pages entering top 10

Business

- Assets delivered
- Cost per asset
- Enquiries attributed
- Cost per enquiry

Measured against a baseline captured before publishing, so the change is attributable rather than asserted. Reports are sent whether the numbers are good or bad, and the calendar changes on the data.

What each asset costs

Per-asset rates, published. No packages to decode, no minimum before you learn the number.

Service	Duration / qty	USD	INR	Includes
VIDEO Instagram Reel (product reveal / marketing)	1 min	\$20	₹1,903	Hook-based script, trendy edits
VIDEO Storytelling / documentary	3 mins	\$38	₹3,615	Narrative storytelling, pro editing
VIDEO SaaS demo / explainer	3–5 mins	\$40	₹3,806	Walkthrough, voiceover, UI explanation
SOCIAL Instagram / Facebook post	Per post	\$3	₹285	Creative design, captions, visuals
BLOG Blog package	5 blogs	\$100	₹9,514	SEO optimised, ready to publish
BLOG Blog package	10 blogs	\$160	₹15,222	SEO optimised, ready to publish

Indicative INR pricing converted at \$1 = ₹95.14 (5 August 2026). Final quotes confirmed in writing.

Monthly retainer

Mix the formats above into one plan. You tell us the volume; we handle planning, production and delivery on a fixed monthly cadence — including a content calendar, 2–3 revisions per piece, priority delivery and a monthly performance report.

What a month actually costs

Three worked examples. Every total is calculated from the per-asset rates on the previous page — nothing rounded, nothing hidden.

Starter

Prove the channel works before scaling it

\$204 / ₹19,406

17 assets • \$12.00 per asset

4 × Instagram reels

5 × blog articles

8 × social posts

Growth — most popular

A real cadence across video, social and search

\$392 / ₹37,290

30 assets • \$13.07 per asset

6 × Instagram reels

2 × storytelling videos

10 × blog articles

12 × social posts

Full Funnel

Top-of-funnel reach plus product-led conversion

\$576 / ₹54,794

44 assets • \$13.09 per asset

10 × Instagram reels

2 × storytelling videos

2 × SaaS demos

10 × blog articles

20 × social posts

Volumes are illustrative starting points, not fixed tiers — tell us the mix you need and we will scope it. Blog packages are priced per bundle; everything else is per unit.

What you get — and what we don't promise

Every engagement includes

- **The content itself, ready to post** — finished assets in the formats and aspect ratios each channel needs
- **Source files and full ownership** — published to your domain and channels, under your accounts
- **A monthly content calendar** — what is produced, for which channel, on which date
- **A monthly analytics report** — reach, watch-through, impressions, clicks, rankings, enquiries
- **Two to three revisions per piece** — if a cut or draft misses, we redo it
- **A named point of contact** — plus a monthly review call

What we do not promise

We are deliberate about this, because most content proposals are not.

- × We do not guarantee revenue, sales or business growth.
- × We do not guarantee rankings, follower counts or view targets.
- × We do not claim credit for outcomes we cannot attribute to a specific asset.

What we control is the work and the measurement: content delivered on schedule, to a standard, with honest reporting on how it performed. Whether that turns into growth also depends on your product, your offer and your market — and anyone who tells you otherwise is selling you something.

Industries this works best for

SaaS & Fintech

Products that need explaining before anyone buys.

EdTech

Long consideration cycles; search answers early questions.

D2C & Fashion

Volume and freshness win the feed.

AgriTech & Manufacturing

Technical operations that are hard to photograph.

Health & Wellness

Trust is the conversion barrier.

Real Estate & Services

High-value purchases where credibility decides the shortlist.

We built the products before we marketed them

Vidyayatan is an IIT-alumni-led software company in Bhopal. For years we have shipped the systems our clients run their businesses on — payments infrastructure, crop monitoring at national scale, labour platforms, learning products.

10B+

Transactions / year

Across products

14+

Companies partnered
Six industries

Those are engineering milestones, not marketing metrics. Marketing is a newer service line for us — we would rather show you a real track record in the wrong column than invent one in the right column. The work in this document is video and writing we have actually produced.

ISO 9001 — Quality management
ISO 27001 — Information security

Let's make you easier to find

Tell us who you sell to and what you want to be known for. We will come back with a video and content plan for the first quarter.
